8. PROPOSED CONSERVATION STRATEGIES
Choose strategies you would like to see studied for your home.

**ROOF:**
- **Insulation**
  - Batt, Rigid or Blown-in
- **Absorptivity**
  - Aluminized Surfacing
  - White Reflective Coating
  - Dark Absorbing Coating
- **Ventilation**
  - If 6" of Space is Available

**EXTERIOR WALL:**
- **Insulation**
  - Outside Rigid Polystyrene
  - Outside Plaster
- **Absorptivity**
  - White Reflective Coating
  - Dark Absorbing Coating
- **Heat Capacity**
  - Add Mass
  - Remove Exterior Insulation
- **Area**
  - Infill Windows with Wall
- **Berming**
  - Earth Berm Portions of Walls

**SLAB:**
- **Insulation**
  - Perimeter Edge (slab-on-grade)
  - Under Floor (Crawl Space)
  - Walls in Crawl Space
- **Heat Capacity**
  - Expose Slab
  - Increase Slab Thickness

**INTERIOR WALL:**
- **Heat Capacity**
  - Add Layer of Sheet Rock to Framed Walls
  - Expose Exist. Mass Wall
  - Add Thermal Mass (Sheet Rock, Walls, Counters)

**MECHANICAL:**
- **Equipment**
  - High Efficiency Systems
  - High Efficiency. Gas Furnaces

**GLASS:**
- **Area**
- **No. of Panes**
- **Type**
  - Single, Double or Triple
- **Absorptivity**
  - Add Reflective Films
- **Interior Control**
  - Insulating, Sealed Shutters
  - Drapes, Blinds, Shutters
  - Daily Operation of Devices
- **Exterior Control**
  - Seasonal Shading Devices
  - Window Ground Cover
  - Plant Vegetation for Shade
  - Horizontal Overhangs
  - Ramadas or Porches
  - Horizontal and Vertical Fins

**AIR TIGHTNESS:**
- **Infiltration**
  - Weather Stripping Around Windows and Doors
  - Caulking Cracks
  - Gaskets for Electric and Telephone Plates
  - Air Infiltration Barrier

**VENTILATION:**
- **Natural**
  - Cross Ventilation
  - Install High Outlet and Low Inlet Windows
  - Enhance Stack Air Flow
- **Mechanical**
  - Ventilation Fans
  - Evaporative Cooling

**CONTROLS:**
- **Thermostat**
  - Nighttime Setback
- **Seasonal**
  - Shade Devices, Thermostats

9. BUDGET FOR CONSERVATION STRATEGIES: $______.00
